

Since 1945

# ***Fire Protection***

a division of Industrial Piping, Inc.

IPI Fire Protection specializes in the design and installation of interior and exterior automatic fire sprinkler systems. Our fire protection services also include repair, inspection, system modification and testing of all varieties of existing sprinkler systems as well as new construction. While IPI Fire Protection provides systems that are economical and efficient, our design and installation activities are conducted in compliance with fire codes and underwriter standards. Through the years, IPI Fire Protection has installed systems in thousands of industrial, commercial, and institutional facilities all over the Southeastern U.S.
