

PROJECT PROFILE

P E T RESIN

Owner: StarPet, Inc.
Project: New Equipment and Piping Retrofit
Location: Asheboro, North Carolina
Contract: \$3.5+ Million

Project Description:

This multi-project contract exemplified IPI's dedication to our client. IPI went the extra mile on every endeavor in order to satisfy our client's needs and expectations. Our ability to meet scheduled milestones with global ramifications was in keeping with our 62 year track record of high quality and standards. At one point, IPI had three of these projects running simultaneously with four different subcontractors. Accountability was key because a large portion of these projects were time and material. IPI met or completed early all projected shutdowns and schedules without fail. These actions created a great rapport and trust that we feel will stand the test of time.

- New equipment and piping retrofit
- Existing steel reinforcing
- New reactor, equipment and piping
- Silo Repair
- Conveying line
